IN COMPLIANCE WITH SECTION 3707.47 OF THE OHIO REVISED CODE OF OHIO. THIS REPORT IS PRESENTED TO THE DISTRICT, ADVISORY COUNCIL, THE STATE DIRECTOR OF HEALTH, AND CITIZENS OF COLUMBIANA COUNTY. ITS PURPOSE IS TO OFFER A BRIEF RESUME OF THE ACTIVITIES OF THE COLUMBIANA COUNTY GENERAL HEALTH DISTRICT.

2019 ANNUAL REPORT

BOARD OF HEALTH MEMBERS
Dr. Jack Amato, President
Shawn Apple, Vice President
Gary Dailey
Thomas Haugh
David Rose

AGENCY STAFF
Wesley J. Vins, Health Commissioner
Jamie Elenz, Medical Services Administrator
Kayla Kemats, Director of Nursing
Lori Barnes, Director of Env. Health
Karen Clark, Director of Personnel & Finance

Health Commissioner’s Message
Wesley J. Vins, MS

During 2019, the staff at Columbiana County Health District (CCHD) heavily invested time and effort into meeting the state mandate of achieving national accreditation from the Public Health Accreditation Board (PHAB), celebrating 100 years of public health in Ohio and the passage of the 10-year cancer detection clinic levy. All while maintaining their daily dedication to protecting the residents of Columbiana County from the spread of disease. To support a healthy community, CCHD continued the core functions of providing leadership in health strategies, vaccinations, food and septic inspections, issuing birth and death records and preparing for emerging diseases like the novel Corona Virus that originated in China late in the year. Providing these services along with many others have been highlighted here in this annual report as a sample of all the great things being accomplished at CCHD every day. To learn more about CCHD please check us out on the web at www.columbiana-health.org, on Facebook or visit us in person at 7360 State Route 45 in Lisbon.

Assisting Customers
Cindy Csonka – Secretary

In 2019, the CCHD posted signs in both the main lobby and the nursing department in an effort to assist our population that may have a disability and/or cultural barriers that make it difficult to communicate.

Point here if you are hearing or voice impaired

Point to your language for assistance

For assistance, call 330-424-0272 or honk your horn three times
Septic Permits
Kevin Summerville, RS Sanitation

In the number of septic related permits issued over the last three years, we have seen a relatively steady trend. In 2019, we saw our highest number of new septic installation permits issued, while replacement, alteration, abandonment and septic presite numbers were down slightly from the previous year. The septic program and obtaining permits help keep the overall health of the community and environment safe by ensuring that sewage is being properly contained and treated so it will not create a public health nuisance. The number of registered septic contractors has remained steady.

![Septic Permits Graph]

The number of private water system permits issued over the past three years had a similar trend as the septic permits show a relatively steady trend with the exception of new well permits showing a significant decrease from 2018 to 2019, due to Winona.

Safe Sleep
Kim Powell-Clerk II

The mission of Cribs for Kids is to prevent infant sleep-related deaths by educating parents and caregivers on the importance of practicing safe sleep for their babies. Portable cribs are provided to families who, otherwise, cannot afford a safe place for their babies to sleep. In 2019, the Safe Sleep Program expanded to include monthly WIC education programs, Columbiana County Fair, Breast Feeding Awareness Month (BAM) event at WIC and Lisbon Safety Day, Columbiana County Health Department educated 118 parents and provided 120 Pack n Plays. All WIC qualifying families with a child under 30 pounds or expectant parents in the 3rd trimester of pregnancy are eligible.

[Cribs for Kids Logo]
Accreditation
Kim Powell-Clerk II

After years of completing plans, selecting and submitting documents, 2019 ended with our Public Health Accreditation Board (PHAB) site visit. The site teams consist of seasoned public health professionals that volunteer their time, and look at health departments across the state to help determine how they are serving their population and determine areas that need improvement.

The 2-day site visit included an agency walk through, review of the Community Health Assessment, Community Health Improvement Plan, and Strategic Plan. Documents were also submitted to demonstrate compliance with the 12 domains of public health accreditation. As all CCHD staff members contributed in the preparation of documents and the entire staff participated in domain review sessions. The site visit also required meetings with CCHD community partners, CCHD governing entity (the Board of Health), and the director of the health department. The site team will submit a report to the PHAB Review Board and PHAB Accreditation Committee will review the site visit report and determine accreditation status of the health department with a decision anticipated by March of 2020.

Open House – Celebrating 100 Years of Public Health
Kim Powell-Clerk II

On October 1, 2019, CCHD held an Open-House to celebrate 100 years of Public Health and the unveiling of CCHD’s new logo, developed by the Branding Plan Strike Team. The community was invited to a Lecture Series, presented by CCHD staff, that included topics such as rabies, food safety, water safety, septic systems, mosquitoes and emergency preparedness.

The nursing staff offered flu, pneumonia and shingles vaccines, as well as blood pressure screenings, car seat inspections and safe sleep education. Free bike helmets for children and vouchers for free rabies shots for pets were distributed.

Columbiana County Health Commissioner, Wes Vins, contributes the success of public health over the past 100 years to the community and partnerships with other health organizations. In 1918, there were 291 children under the age of 5 that perished in Columbiana County. In 2018, there were only 5 deaths in that age group. Over the next 100 years, CCHD will continue to grow with the advances in public health to encourage a “Safe Community of Healthy People”.

Water Pollution Control Loan Fund Septic Funding
Lori Barnes, Environmental Director

The Columbiana County Health District has been very successful in replacing septic systems with funding through the Water Pollution Control Loan Fund (WPCLF) grant through the Ohio EPA since 2009. In 2019, The WPCLF 2018-19 grant of $200,000 was able to repair/replace 13 septic systems in 2019 and connect 2 homes to sanitary sewer.

The Columbiana County Health District was awarded an additional $150,000 for the 2019-2020 construction season and repair/replaced an additional 7 septic systems so far.

The health district is set to receive another $150,000 in funding for the 2020-21 construction season. Due to the success of the program, there are approximately 50 homeowners on the waiting list to be funded and the health department will have to prioritize projects.

Negley, Ohio

Person in Charge Food Protection Certification Training
Sandra Wiesen, R.S.

CCHD sanitarians instructed twelve Person in Charge (PIC) Food Protection Certification classes in 2019. A total of 96 students from 38 different licensed facilities received their PIC food protection certificates. The Ohio Uniform Food Safety Code requires PIC or manager food protection certification for at least one designated PIC per shift of a food service operation or retail food establishment. CCHD provides PIC food protection classes at the health department generally once per month at no cost to Columbiana County employees and/or residents.

A new Ohio Department of Health (ODH) certification rule went into effect on April 1, 2019 that requires all Ohio PIC courses to be submitted with course curriculum updates to the Director of Health for approval before January 1, 2020. PIC courses that have not received approval by April 1, 2020 are disapproved by ODH. Certificates issued through disapproved courses do not meet the ODH PIC food protection certification requirement. The CCHD PIC updated course was first submitted on November 7, 2019 and received ODH approval on December 24, 2019.
Real Estate Inspection Program
Laura Fauss, RS Division Coordinator

The real estate inspection program at CCHD continues to grow as we again saw a slight increase in inspection numbers. In 2019, two full time sanitarians and one seasonal employee inspected a total of 557 properties prior to transfer. Of those, septic related nuisance conditions were found at 21% of the properties and 28% of the drinking water sampled during inspections, was found to be unacceptable for consumption.

The environmental division at CCHD offered two free training days in 2019. These trainings were for registered septic installers, haulers and service providers, where they were able to obtain their required Continuing Education Units for annual registration. Topics included the history of sanitary systems, exposure to communicable diseases and the new technology of peat bio filters.

Plumbing
Leon Estes – Certified Plumbing Inspector

The CCHD plumbing program continued our partnership with the Village of Lisbon to administer their state mandated backflow device program under our current agreement. CCHD also continued to provide customary services such as consultations in the field, plan reviews, and plumbing inspections.

In 2019, 63 master plumbers and 22 journeymen were registered, also 250 new plumbing permits were issued.
Communicable Disease Surveillance

Jamie Elenz, NP

The Ohio Department of Health (CDH) declared a statewide community outbreak in June 2018 after observing an increase in hepatitis A cases. The outbreak continued for the entire year of 2019.

Hepatitis A is a vaccine preventable liver disease, usually spread when a person ingests microscopic fecal matter from another person or from contaminated objects.

Columbiana County had a total of 3 cases of hepatitis with 1 case being within the Health District.

The high-risk populations for hepatitis A in this outbreak include:
- People who use drugs (injection or non-injection)
- People experiencing unstable housing or homelessness
- People who are currently or were recently incarcerated
- Men who have sex with men (MSM)
- People with chronic liver disease, including cirrhosis, hepatitis B, or hepatitis C

CCHD provided hepatitis A vaccine to the Columbiana County Jail inmates at no charge, thanks to available funding from the Ohio Department of Health. A vaccine initiative was part of a statewide effort to reduce the risk of hepatitis A in the community. Hepatitis A vaccine was also provided to interested residents at the Columbiana County Fair.

![2019 REPORTABLE CONDITIONS](image)
Public Health Preparedness Planning for Disasters and Emergencies
Paula S. Cope, R.S., PHEP Program Director

The staff at Columbiana County Health District, (CCHD), work in partnership with local, regional and state partners to remain prepared for a vast array of emergencies. The Emergency Preparedness program is funded through the Centers for Disease Control, (CDC), Public Health Emergency Preparedness (PHEP) grant. In 2019, essential staff participated in the following partner trainings and exercises:

Northeast Central Ohio (NECO) 2019 Regional Functional Exercise involved testing our department’s ability to conduct a general investigation regarding an Infectious /Communicable Disease [Hepatitis A].

CCHD staff and CERT team members participated in a mock Volunteer Reception Center Drill organized by the Columbiana County Emergency Management Agency and the Ohio Military Reserve.

CCHD staff and local county hospital safety personnel participated in a local response to a Zoonotic Outbreak Table Top Exercise sponsored by OEMA, ODH, ODA, OSU, FBI, and USDA.

CCHD Nursing and Environmental staff conducted three required data collection drills involved in the set-up of an Open Point of Dispensing Flu Clinic.

When planning for, or participating in any emergency preparedness event, CCHD maintains a high level of effectiveness across six preparedness domains and complies with fifteen CDC PHEP capabilities. The PHEP program is responsible for ensuring all CCHD employees have (ICS) Incident Command Systems and (NIMS) National Incident Management System training.

One of the six domains in the CCHC Planning Guide Document is to Strengthen Surge Management by addressing high numbers of fatalities.

In November 2017, CCHD submitted a $43,000.00 Homeland Security grant application through the Columbiana County EMA for a mobile morgue trailer. After a lengthy bid process and revised specification requirements, the delivery and acceptance of the Columbiana County Mobile Morgue Trailer was finalized in August 2019. The trailer holds eighteen (18), fold-down body racks that can be used to support stainless steel body trays. It has a minimum gross vehicle weight of 7,000lbs. In partnership with Columbiana County Emergency Management Agency, the CCHD plans to use the trailer in training exercises when not being used for coroner needs. Our mobile morgue trailer is the 6th mass casualty trailer in the state. Not only is this a great resource for Columbiana County because our county does not have a morgue, but the mobile morgue trailer can be utilized by our NEOC region partners as well.
**Vaccines for Children: VFC**  
*Krista Colvin, Medical Assistant*

The Vaccines for Children (VFC) program is a federally-funded program sponsored by the CDC and administered in Ohio by the Ohio Department of Health. The VFC program supplies vaccine at no cost to the Columbiana County Health District. Any child from birth through 18 years of age is eligible to receive VFC-supplied vaccine if he/she meets at least one of the following criteria:

- The child does not have health insurance.
- The child is enrolled in Medicaid.
- The child is an American Indian or Alaskan Native.
- The child has health insurance that does not entirely pay for vaccine.

In 2019, CCHD administered 735 doses of VFC vaccine.

**VaxCare**

CCHD has been able to continue to expand our immunization services by utilizing VaxCare; a provider of private vaccines. By utilizing VaxCare, CCHD is able to immunize patients with private insurance for both pediatric and adult vaccines. In 2019, CCHD administered 234 doses of VaxCare vaccine.

**Handwashing**  
*Krista Colvin, Medical Assistant*

The hand washing program was back again in 2019. This program was developed to help teach children grades pre-k through 3rd grade proper hand washing steps and techniques. The CDC and American Cleaning Institute have recognized the dire need for young people to wash their hands effectively to decrease the spread of illnesses and absenteeism in the classroom. Nearly 22 million school days are lost due to the common cold alone.

In the beginning of 2019 the program was presented to Crestview Elementary and United Elementary. During these classroom events 200+ students were instructed on the importance of washing hands, and the five proper steps to do so. The students engaged in a hands-on activity that allowed them to visually “see” the germs on their hands. After washing them using the proper hand washing steps they were able to visually see how many germs were left on their hands. This activity was successful helping the children realize exactly how many germs live on our hands and how easy they are to spread to one another. The children were left with an understanding of how germs spread, and that the best way to get rid of them is to wash your hands correctly!
The Columbiana County Health District ended 2019 very financially stable in each of our funds. Our small but efficient staff did an excellent job providing services to the community while allowing us to stay within our budgets. Much time, money and effort went into the accreditation process in 2019. Preparing documents and the building for our PHAB site visit in December, with notification of results to come in March 2020.

Below is a list of the funds and dollar amounts that were sent to the Ohio Department of Health for their portion of every license, permit or vital stat generated by our department in 2019:

**COLUMBIANA COUNTY GENERAL HEALTH DISTRICT**

**SUMMARY OF RECEIPTS, EXPENDITURES & BALANCES**
Columbiana County Vital Statistics 2019

Registrar Districts 1500, 1503, 1504, 1505, 5010

Vital Statistics is, as it states, keeping statistics for vital records for birth, death and issuing of burial permits. Vital records provide legal documentation of the event. With the implement of central issuance for birth records and the use of the web base site of Vitalchek, CCHD has successfully issued over 3,775 documents (123) being issued through the web-based program. Working with the Veteran’s Administration, Columbiana County Health District Vital Statistics has had the honor of making 70 certified death records available for families of Veteran’s to receive death benefits of our service men and women who have passed.

- 364 Burial Permits Issued
- 1692 Birth Certificates Issued
- 2083 Death Certificates issued

In March 2016, ODH/VS introduced a new pathway for the filing of paper death records known as E-Filing. This gives funeral homes a way to submit a signed death record to the locals by email. We were able to offer this program to our funeral homes in 2018.

Child Fatality Review Board

In 2000, legislation enacted that records every county in Ohio to create a Child Fatality Review Board to review the deaths of any children age 18 and younger. The ultimate purpose of the Child Fatality Review Board is to decrease the incidence of preventable child deaths by:

- Promoting cooperation, collaboration, and communication between all groups, professional agencies, and entities that serve families and children.
- Maintaining a comprehensive database of all infant and child deaths that occur in Columbiana County in order to develop an understanding of the causes and incidence of those deaths.
- Making recommendations to local agencies for the development of new programs and change current programs that will help prevent infant and child deaths.
- Advising the Ohio Department of Health of aggregate data, trends, and patterns concerning children deaths.

In 2019, we reviewed six deaths that occurred in the year 2018. After circumstances surrounding each child’s death are examined, the board attempts to make a determination about the preventability of each death. The board felt it was appropriate and necessary to convey the following points:

To prevent infant sleep related deaths:

A. Babies should always sleep Alone
B. Babies should be placed on their Back
C. Babies should sleep in a Crib

To prevent child/teen suicides:

1. Suicide prevention and screening should be enhanced
2. Firearms are to be secured to prevent child and teen access

Preventing Child Injuries: For the past seven years we have been able to distribute over 550 Safety Helmets. Columbiana County Health District has partnered with The American Academy of Pediatrics to make this happen.

In the know: Case study of the last six years

Columbiana County Health District: Had 15 drug overdose related deaths in 2019 and 15 in 2018. Basically, the same as the year before with no increase, this does not include the cities of East Liverpool or Salem. The drug epidemic has decreased/stayed the same since 2018, with the help of Project Dawn.
ANIMAL BITES & RABIES PREVENTION PROGRAM
Kayla Rose, Environmental Clerk

In 2019, Columbiana County Health District investigated 157 bite incidents. The chart below summarizes those investigations. CCHD submitted 13 animals with the assistance of Lisbon Veterinary Clinic to Ohio Department of Health for rabies testing due to human contact with suspect animals. Throughout 2019, CCHD submitted 5 animals to United States Department of Agriculture (USDA) Wildlife Services for rabies testing on suspect animals that have no human or animal contact. Fortunately, all CCHD’s 2019 submissions tested negative for rabies. However, statewide, it was reported in 2019 a total of 4 animals tested positive for rabies in Ohio (1 Ashtabula, 2 Mahoning & 1 Tuscarawas). CCHD has continued to partner with Lisbon Veterinary Clinic to offer two low-cost rabies vaccination clinics, one in the spring and the other in the fall. A total of 235 dogs and cats were vaccinated against rabies at these two clinics.

Caution should always be used around any wild or unvaccinated animals. Be sure to have your pets up-to-date on their rabies vaccination, which is required by law. Also, Ohio law requires that “whenever an individual is bitten by a dog or other non-human mammal, report of such bite shall be made within twenty-four hours to the health commissioner of the district in which such bite occurred. The report herein required shall be made by any health care provider, or by any licensed doctor of veterinary medicine with knowledge of the bite, or by the individual bitten”

2019 Mosquito Surveillance & Community Outreach Program
Don Heverly, Intern

During the summer of 2019, CCHD was awarded the Mosquito Control Grant by the Ohio EPA. This grant focused on preventing mosquito diseases in Columbiana County residents. CCHD was able to hire an intern whose sole focus was education and prevention of mosquito-borne diseases such as West Nile Virus and La Crosse Virus using radio PSA’s, television commercials, and informational pamphlets. Activities included capturing mosquitoes and mailing them to the Ohio Department of Health Lab in which they were tested for disease. CCHD’s intern captured a total of 1,891 mosquitoes to which none tested positive for WNV in Columbiana County during this time.

Lisbon Safety Day
Cancer Detection Clinic Levy Passes!

Thanks to the voters in the general health district, our Cancer Clinic levy passed in November! Our Cancer Clinic is funded by a two-tenths mil real estate tax levy voted on every ten years. The Cancer Detection Clinic provides quality health care cancer screenings, education, referral for follow-up and a reminder/recall system. Columbiana County is the only county in Ohio that provides cancer screening services funded this way. How did it get started? A history lesson:

- Prior to 1965, Ohio had the 4th highest rate of cervical cancer deaths in the nation.
- CCHD recognized the need for an intervention.
- In 1965, CCHD received grant money from the Ohio Department of Health and began operating a Pap clinic.
- This grant money lasted for 15 years until 1980.
- In 1980, the Board of Health proposed a real estate levy to the residents of Columbiana County to continue operating the Pap Clinic.
- The levy continues to fund the clinic today. We have been able to expand our services to also include clinical breast exams, pelvic exams, mammograms, skin cancer screenings, and prostate cancer screenings.

We look forward to providing Columbiana County residents with life-saving cancer screening services over the next ten years!

Children with Medical Handicap

Kayla Kemats, RN Director of Nursing

The Children with Medical Handicaps (CMH) program is facilitated to assist families with children who endure special healthcare needs. There are three programs associated with CMH which include diagnostic, treatment, and service coordination. Once families are approved for these programs, the out-of-pocket cost for medical expenses associated with the approved diagnosis are significantly decreased or eliminated. There are criteria in the fields of medical and/or financial guidelines in order to be eligible for CMH services.

CMH Patients Total: 258       Home Visits: 47       Children Added: 65

Columbiana County Health District's Nursing Division dedicates committed effort to ensure that all children and their families are receiving the resources they need through the CMH program.

1919 - 2019

Celebrating 100 Years

Public Health

MISSION:

“To create a healthy place for all to live, work, and play by preventing disease in the community through partnership, encouraging people to make better choices, and promoting overall health and wellness.”

VISION:

“A safe community of healthy people.”

Read and laugh together, love each other, be safe, wash hands, eat healthy, exercise and immunize your children!
